Brainstorming & Idea Prioritization Template

Date	2 October 2026
Team ID	6abca5b16f395c49751f124d
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	4 Marks

Step 1: Team Gathering, Collaboration and Select the Problem Statement

The team selected the problem of making customizable legal-document drafting more accessible through a guided AI workflow. The selected solution must collect structured user inputs, generate a draft using Gemini, allow editing, and export the final content in multiple formats.

Step 2: Brainstorm, Idea Listing and Grouping

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Hemanthkumar J (Team Leader)	Use Google Gemini to generate document-specific legal drafts from structured inputs.	AI Integration	1
2	Hemanthkumar J (Team Leader)	Use FastAPI as a modular backend API for validation and generation requests.	Backend	2
3	Harish K	Build a Streamlit interface for document type, parties, terms and effective date.	Frontend	2
4	Harish K	Provide an editable preview before final export.	User Experience	3
5	Jagan K	Support employment contracts, NDAs, leases, service agreements and custom documents.	Feature	1
6	Jagan K	Add TXT, DOCX and PDF download options.	Export	3
7	Jayaprasath U	Create professional DOCX/PDF formatting with headings, footer and branding.	Formatting	3
8	Jayaprasath U	Use placeholders rather than inventing missing factual information.	Reliability	4

9	Jayavel V	Keep API keys in .env and make the repository GitHub-safe.	Security	4
10	Jayavel V	Add validation, friendly errors and automated tests.	Quality	4

Step 3: Idea Prioritization

Priority	Selected Idea Group	Reason
High	AI generation + document types	Core value of LegalEase
High	FastAPI + Streamlit workflow	Required application architecture
High	Editable preview + exports	Required end-user workflow
High	Validation, security and safe drafting	Improves reliability and GitHub readiness
