Data Collection & Preparation

Date	2 October 2026
Team ID	6abca5b16f395c49751f124d
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	Project Deliverable

Data Requirement

LegalEase does not require a conventional training dataset because it uses a pre-trained Gemini model through an API. The primary runtime data is user-provided document information.

Input Data

Input	Purpose
Document Type	Determines the structure and clause focus.
Parties Involved	Identifies people/entities and their roles.
Terms & Conditions	Supplies user-defined clauses and obligations.
Effective Date	Defines the requested effective date.
Jurisdiction (optional)	Provides contextual location when supplied.
Additional Instructions (optional)	Captures special drafting requirements.

Preparation & Validation

- Trim and validate required text fields before API submission.
- Normalize whitespace and unsupported characters for export.
- Keep user facts separate from AI instructions.
- Use explicit placeholders for important missing factual values.
- Do not persist sensitive document data unless the application explicitly requires it.
