User Acceptance Testing (UAT) Report

Date	2 October 2026
Team ID	6abca5b16f395c49751f124d
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	

UAT Objective

Validate that LegalEase supports the end-user workflow defined in the project specification: enter legal-document details, generate an AI draft, preview and edit it, and download the latest version in multiple formats.

UAT Scenarios

UAT ID	Feature	User Action	Acceptance Criteria	Status
UAT-01	Open Application	Launch Streamlit frontend.	LegalEase interface and disclaimer are visible.	To be verified
UAT-02	Generate NDA	Enter NDA details and generate.	Relevant structured NDA draft appears.	To be verified
UAT-03	Generate Employment Contract	Enter employment details and generate.	Relevant employment draft appears.	To be verified
UAT-04	Edit Draft	Modify generated wording.	Edited content is retained for export.	To be verified
UAT-05	TXT Export	Download edited document as TXT.	Readable latest version is downloaded.	To be verified
UAT-06	DOCX Export	Download edited document as DOCX.	Word file opens with formatting.	To be verified
UAT-07	PDF Export	Download edited document as PDF.	PDF opens with professional layout.	To be verified
UAT-08	Error Handling	Trigger invalid/missing input.	User receives understandable validation/error message.	To be verified

Acceptance Summary

The UAT is considered complete when the required scenarios are executed on the final build and the observed statuses are recorded.
